Sales Executive

SUMMARY

Successful Sales Executive with over fifteen years experience selling into Fortune 500 Accounts, enterprise, service provider, distribution, VAR Channel, federal government, and hosting data centers.

SKILLS

A strong business development sales professional with account management and problem solving ability to handle complex sales cycles and create ongoing customer relationships.

Xerox Solution Sales	Business Development	Service Delivery
Strategic Selling	Federal Sales	Quality of Service (QOS)
Major Account Sales	Client Engagement	Customer Service
ROI/TCO Solutions	Vertical Market Solutions	Revenue Capture
Territory Development	Message Development	Project Management

PROFESSIONAL EXPERIENCE

Consulting Services

July '07-present

- Solution Sales Delivery for architecting and coordinating both sales and product marketing for Vendor/VAR relationships.
- First Responder Bundled Offering for last mile applications for a System Integrator. Hybrid vendor solution which included Juniper, Aruba Wireless and Foundry.
- Implemented a coordinated multi vendor sales delivery architecture based on theme based branding initiative in an e-commerce environment.

RioRey, Inc.

July '06-June '07

Director of Service Provider Sales

- Pre-IPO, privately funded start up organization, focused on developing next generation DDOS network security detection and mitigation platforms. Hired to conduct market analysis, customer trends and establish proof of concept for the development of a Network Perimeter Defense Platform for service providers. Successfully penetrated web hosting content providers for reference accounts, established a two-tier sales channel, and established a sales and system engineering methodology within 6 months.

UTStarcom, Inc.

April '04- June '06

National Account Manager

- Employed as a National Account Manager for a \$2b manufacturer of IP-based, end to end networking solutions which include VOIP IP Switches and Gateways, IPTV Systems, VOIP Integrated Access Devices (IADS), IPTV set top boxes, GEAPON fiber optic equipment, Voice Mail, and WiFi Access Solutions.
- UTStarcom product initial order of \$3.1m.
- Expanded the scope of work in FY2005 to include \$1.5m of GEAPON equipment

COPPERCOM, Inc.

June '01 – April '04

Southeast Regional Sales Manager

- Regional Sales Manager for a Software and Hardware manufacturer of a Class4/Class5 Softswitch System.
 - Achieved 100% of booking plan
 - 152% of shipment plan
 - Salesman of the Year" Award
 - New Salesman of the Year" Award

PARADYNE CORPORATION

Sept. '97 – June '01

Manager, Strategic Accounts North American Sales

- Manager of Strategic Accounts for a manufacturer of broadband access products
- Initially employed as the Southeast Regional Sales Manager responsible for selling:
 - High end commercial customers and developed sales channels for VARs.
 - Channel development for Paradyne's SLM products to Lucent, MCI and Verizon.
- Achievements were "Doubling the revenue" from \$1.8m to \$3.7 million!
- Promoted to the Network Service Provider Group as Manager of Strategic Accounts.
 - specialized in Telco and ISP system integration channels
- Managed and Develop 50 major accounts across the U.S.
- Achievements Developed a "\$30 million dollar pipeline of revenue".

VERILINK CORPORATION

Sept. '95 - Sept. '97

Regional Sales Manager - Strategic Accounts

Regional Southeast Sales Manager for a manufacturer of a broadband integrated access platform that provides hybrid LAN-WAN internetworking solutions to enterprise, VARs and service providers.

- Implemented a two-tier channel distribution network and a vertical key account program. Developed my assignment into \$1.2M territory.
- System Integrators and VARs and Federal Government Sales.

REFERENCES:

Furnished upon request.

June 1, 2010

Dear Gov. Brewer,

I am writing to you as a friend of The State of Arizona, who has many friends in your state, a native New Yorker, Italian-Irish Catholic, who grew up on Long Island and whose family built many foundations in the New York City metropolitan area. Also, I am one of many New Yorkers who will never forget what Arizona did for all of us after 9-11. We are living in turbulent times in which the safety and security of our country is at risk. What is even more disheartening is that our own citizens have compromised us. The last time I checked, we are at war, and the events and actions that were perpetrated by these citizens are treasonous. As you review the information that I have enclosed, I would like you to view it from the perspective of being an officer in The United States Military who has an obligation, a fiduciary responsibility, to protect your troops. Corporate executives have the same obligation in protecting their employees (OSHA; Civil Rights etc.) unless they are part of a criminal enterprise with a purpose. Also, please note that I contacted the Attorney General for the State of Arizona, Mr. Terry Goddard in September of 2009 concerning crimes that were committed in your state. Based on recent events, it does not surprise me that nothing has been done to protect the citizens of Arizona and the state law enforcement officers who risk their lives every day protecting the Arizona border.

Based on events that I have been personally involved in, I am hereby notifying you that there is a strategic and imminent threat to our national infrastructure that is multi-faceted and comes from within "corporate America". I am also notifying you that crimes (Felonies: ID Theft, Access Device Fraud, Criminal Negligence, Espionage, failure to disclose felonies, and more) have been committed in the State of Arizona, the State of Florida, the State of Illinois, the State of Oklahoma, the State of Michigan, the State of Washington, the State of California, the State of Tennessee the State of Missouri, the State of Colorado, the State of Pennsylvania, the State of South Carolina, the State of Georgia, the State of Connecticut, the State of New York, the State of Texas, the State of California, the State of Virginia, the State of Kansas, the State of Mississippi and the State of Alaska and others

that compromised our citizens, commerce, our military, the defense industry and our security. It is even more disturbing that this activity started many years ago, was enabled by Congressional legislative action, incentivized by Wall Street "investment" firms, and compliance processes and procedures were not followed or investigated. Also, since Bank of America was bailed out by the taxpayers, I would enjoy telling you how account holders money was invested and how employees and investors were misled. It is Adelphia on MSG with cash businesses on the side. Also, you should know that Bank of America financed a criminal enterprise that was engaged in espionage and other criminal matters. Over this last year, Americans have lost their jobs, continued to lose their healthcare, lost their homes, lost their retirement, suffered from identity theft, and at the same time, our education system continues to erode over time. All these conditions are caused by government actions, government inaction, poor analysis and review of key issues, as well as the media who refuse to report the facts and precedents as well as the cause and effect of key decisions by our government representatives. A lot of these actions and inactions could never stand up to the "reasonable man standard", and basically attacks our integrity by patronizing the American people. In essence, there is no transparency and no accountability to "we the people" because our government officials believe that they have effectively "dumbed us down".

Initially, I believed that what I witnessed only encompassed physical components of the national infrastructure, FCPA violations, EEA Violations, Arms Control violations, ITEC violations, and espionage. However, I wish to point out that with the recent events concerning voter fraud and identity theft, the threat is more pervasive and includes our personal identities as citizens of the United States of America. (ACORN; Truck Drivers; ICE -China, Mexico)

Imagine that you work for a multi-million dollar, publicly traded corporation, that is supposedly an American company, U.S. based, registered in the State of Delaware, has been in business for over a decade, and conducts business with many nationally recognized companies. Now imagine that the company's Human Resources Department has been extremely compromised and invasions of privacy and HIPAA violations occurred. Furthermore, imagine how personnel documents for employment such as: a driver's license, a copy

of a birth certificate, a copy of a social security card, copies of utility bills, a medical report submitted for international travel, copies of prescription reimbursement forms, as well as copies of beneficiary and insurance information can be combined with a copy of a resume and utilized for identity theft, fraud, criminal activity, espionage as well as threats against our country. To make matters worse, imagine that the company conducted business without transparency and its legal department maintained a tight veil of secrecy over the internal operations of the "enterprise" so that employees feared coming forward. Does this sound familiar? I hold the Board of Directors, the internal corporate legal department, and Bank of America as the most morally wrong and responsible as they bankrolled UTStarcom, Inc. This company's true corporate identity has been "masked" since 1991 and is actually an ADR with joint ventures set up with the Chinese Government, which the last time I checked, is still a communist country and is actively engaged in trying to steal our intellectual property and "learn" our military and satellite communication systems. These ventures were duly noted in their annual 10-ks from 2004-2007 (HUTS) (Starent), and I gave my research information to federal authorities and then everyone became suddenly "aware".

Gov. Brewer, like yourself, I come from a great family. I will give you my commitment that I will be there for you. Please realize, all fifty states were affected by the communication technology that this company sold and supported in the internet service provider, transaction processing, personal communications and first responder markets. Please note that UTStarcom's MM2000 CDMA technology which did not meet the CAMEL specification was installed in Florida, Missouri, Texas, Alaska, Nebraska and Georgia. It was subject to "man in the middle attacks". Employees and customers notified the company numerous times. Also, the TCT1000/2000 Gateway products, located in your state, were never upgraded to meet OAM and P specifications until after I notified the appropriate authorities. Again, the company was notified on numerous occasions by employees and customers. (Stanford issues-legal) Please note that these gateway products were installed in almost every state to handle internet and transaction processing traffic. Additionally, intellectual property and software were also compromised as well as security

breaches before, during and after Hurricane Katrina. There were network node points in the State of Arizona, the State of Florida, the State of Illinois, the State of Oklahoma, the State of Michigan, the State of Utah, the State of Washington, the State of California, the State of Tennessee, the State of Missouri, the State of Pennsylvania, the State of Mississippi, the State of Georgia, the State of Connecticut, the State of Texas, the State of Alabama and the State of Louisiana, the State of Alaska, the State of Virginia, and the State of Maryland, the State of Colorado, as well as others across the country in which our telecommunications infrastructure was "imprinted".

Additionally, please note that this company functioned as a "pump and dump" Ponzi scheme in which investors, employees and retirees were affected and wire and mail fraud was apparent. In essence, you have the Madoff case with espionage and a criminal enterprise functioning as a publicly traded company with significant property here in Florida, California and Illinois. I advised the authorities of this exact scenario before the Madoff case came into the public view. Please also note that senior citizens and groups that represent their interests such as AARP and retirement funds have been affected. (Please see U.S. v Chauncey Shey – NASD Briefing. This is a starting point as it reveals a "hedge company", the first brick of the foundation of fraud and a criminal enterprise). Now imagine how senior citizens, investors, the military, defense contractors, DEA and ICE agents, and consumers in The State of Arizona (see Electricians Unions) have been impacted. Gov. Brewer, there is much more concerning this "enterprise" in regards to e-commerce, data center security, network security, criminal negligence, consumer product safety, and other matters.

Due to the internal operations of this "enterprise", I have spent a significant amount of my personal funds to break the veil of transparency. I have worked extremely hard over the last 23 years and was looking forward to retiring until I was involved in this matter. I am currently un-employed, trying to start a small business, and have been severely impacted by this entire matter. I have no regrets for what I had to do. I am a native NYer, grew up on LI, grew up Italian-Irish, attended Chaminade High School, attended the University of Maryland and a student of Gordon Prangue, and have great friends that have always understood what "Do the Right Thing", "Stand Up" and "Ethics and

Principles" mean. It is probably all because we know and understand "The Bridge". We may be lost day to day, but we all know where we are going and no one or group of people is going to stand in our way. I have stood up; I am still here; I am going down because I did, but will continue to stand up and not go away.

The totality of all the events I was personally involved in is a full case model for what is wrong. All impacted me, as well as all of "US". I walked through this with the appropriate authorities. Now, I am requesting, that since our federal government has failed to protect "US", that you view these events from a states' rights perspective as The State of Arizona (PUC) and other individual states have been compromised. I have had the privilege of meeting great people all my life, and I still believe that this country is made of good people. We have been hijacked by the few and this includes the media. As a country, we need to understand what the impact of greed and treasonous behavior can yield. If you look at what is required in the field from a DHS/Counter Terrorism perspective, we all need to be on the same page with accurate information. Also, based on my experience, you will find that many of the bureaucracies are still not on the same page, and the same issue of political decisions by "middle managers" is still very apparent. Imagine if this happened to you as an individual or anyone of your family members or your troops. What is even more sinister is that this company is still actively trading on the NASDAQ.

Please note that I was a resident of the State of Florida and maintained an office here in Orlando during this time period. I also have personal references for you if needed here in Florida, California, New York, and across the country, and I am a member of The NDIA. (Reference RICO)

Please feel free to reach me directly or by contacting Mark Horwitz, Attorney at Law, at (407)843-7733 as he and his staff assisted me in this effort and can help provide an outline as to all the material that we have reviewed (10,000 pages plus research. In addition, I have evidence on how religious websites have been attacked). Mark also is a great American and a student of history. Please see the attached and also note that I am a centrist, no one person or group has all the answers, and feel that we are involved in a new face of war

in which we are being exploited from within our own physical boundaries. Politics is not really what this is about. It's about "US" and taking a stand. There must be accountability for this exploitation as well as treasonous conduct by our so-called "business giants" against the American people and the citizens of the State of Arizona.

Your attention to this matter would be greatly appreciated, as I know you have already "stood up". Please contact me. I want to help and I need help and so does ALL of "US".

Thanking you in advance,

United We Stand 9-11 tom_marin22@hotmail.com (407)380-9247
